The development of global business has led to an increase in demand for air cargo services

Air transport allows people from different countries to cross international boundaries and travel other countries for personal, business, medical, and tourism purposes.

Does

It involves the use of

airplanes, helicopters, and

other types of aircraft to

transport passengers,

cargo, and other goods

between different

locations, whether

domestic or international.

What behavior have we observed? What can we imagine them doing?

Thinks What are their wants, needs, hopes, and dreams? What other thoughts might influence their behavior?

It require less time. Air transport provides comfortable, efficient and quick transport services.

It is regarded as best mode of transport for transporting perishable goods.

Empties your energy tank. Air pressure is lower at higher altitudes, which means your body takes in less oxygen.

Airlines "pressurize" the air in the cabin, but not to sea-level pressures, so there's still less oxygen getting to your body when you fly.

It can make you feel drained or even short of breath.

Feels

What are their fears, frustrations, and anxieties? What other feelings might influence their behavior?
